

Community Energy Transition Foundation

We are committed to supporting our communities through a Community Energy Transition Foundation, which invests in those areas where we have operational sites. The Foundation receives funding from each site, proportionate to its size.

We expect this project, if approved, to contribute up to £500K each year.

With that funding, the Foundation can then provide substantial financial support to individuals, businesses, charities and community groups to promote sustainable communities and provide a financial stimulus for the green transition in your area.

That's why we would like to hear from you about what your community needs to become more sustainable and how the Foundation could help.

The types of projects that will be considered for funding include:

- Emissions reduction
- Habitat enhancement
- Energy efficiency
- Education/skills support
- Sustainable transport
- Green economy
- Sustainable agriculture

In terms of practical application, the fund could potentially invest in initiatives such as:

- Electrification of vehicle fleets, including tractors and trucks;
- EV community pool cars;
- Small-scale solar generation;
- Battery tools for use in expanded allotments.

Next Steps

Thank you for taking the time to learn about our plans. Your feedback is invaluable and, where possible and appropriate, we will look to incorporate your comments into our evolving proposals.

Please complete a feedback form and let us know what you think. You can fill one out here today or go to our project webpage for an online form (QR code below).

All feedback should be returned to us by 25th April 2025.

We will consider all feedback and finalise our plans to submit a planning application to Flintshire County Council. As part of the application, we will submit a document that summarises the community's comments and the engagement undertaken for the project.

Flintshire County Council will then conduct its own statutory consultation before determining the application. This will provide stakeholders, residents and other interested parties with another opportunity to provide feedback on our proposals.
